

HeatSensor

HEATSENSOR® DUO - OCTO are incubators ensuring all Unisensor diagnostic tests to receive a fixed incubation temperature no matter what the ambient / operating temperature.

Both incubators are a **One Step Test Procedure**.

KEY-POINTS

- Automatic release of dipstick.
- Compatibility with all test kits from UNISENSOR.
- DUO is for maximum 2 tests at a time.
- OCTO is for maximum 8 tests at a time.
- Self-timing with light and audio signal.
- Countdown timer display.
- Product's specific program included.
- Easy to use.

SPECIFIC PROGRAM

Select the right program and place the dipstick.

AUTOMATIC

The dipstick falls down automatically into the microwell after the first incubation time.
