

TradKon SPC

TradKon SPC-500P

Non-GMO

Traditional Soy Protein Concentrate
for Piglet and Poultry Feed, Pet Food

SOJAPROTEIN

High quality Non GMO Soy Proteins from Serbia

Main advantages of TradKon SPC-500P

- **High level of protein:** typical **min. 63% as is** (min. 68% dry matter); guaranteed min. 62% as is
- Particle size: coarse
- Substantial **economical benefits** (price per protein unit)
- Good digestibility (95%)
- **Especially low level of anti-nutritional factors** and high level of essential amino acids (compared to other products) due to alcohol extraction production process
- **VERY LOW** antinutritive factors (guaranteed values):
Trypsin inhibitor activity < 2 mg/g,
Glycine < 3 ppm, β -Conglycine < 3 ppm
- Better gross, digestible and metabolizable energy than fermented and enzyme treated soybean protein products (up to 5%)
- Produced only from **Non-GMO** soybeans grown in Serbia

TradKon SPC

TradKon SPC soy protein concentrates are produced in such way as to have anti-nutritional factors eliminated. That makes TradKon SPC the appropriate products in animal feed, especially for younger categories with undeveloped digestive tracts:

- CMR (fattening and rearing calves),
- Piglets and poultry,
- Aqua feed
- Pet food.

The advantages of using TradKon soy protein concentrates in animal feed:

- replacing animal feed diet (fish meal, meat and bone meal)
- better amino acid spectrum
- higher nutritive value and low level of oligosaccharides
- very low level of Anti-Nutritional Factors
- especially low level of iron for CMR feed
- substantial economic benefits
